- ▶ Contamination
- ▶ Software Defects

Benefits of LWG Consulting equipment loss consulting services

Reduce Loss Expense

Reduce the claim amount by identifying and quantifying viable reinstatement options rather than the equipment being treated as a total loss.

Minimize Business Interruption

Determining reinstatement options which are invariably faster than the replacement option.

Shorten Claim Cycle Time

Rapid confirmation of the extent of damage and identification of reinstatement options, supported by factual information and financial estimates.

Verify Cause to Assist with Coverage Determination

Through forensic engineering services, identify the cause and origin, thus assisting with determining policy coverage.

Help to Effectively Evaluate and Pursue Subrogation

Through determining cause and origin and carrying out technical analysis, provision of factual substance and evidence to support subrogation.
