

View Video Evidence in a New Light

LWG provides proven Video Forensic services to help you acquire the authoritative evidence you need to bring clarity to your investigation. With our experience and technical expertise, LWG can provide you with court proven measures including:

- ▶ Recovering video data from fire damaged equipment
- ▶ Obtaining a forensic copy of video to be used in investigation
- ▶ Determination of the correct acquisition process to fulfill your requirements
- ▶ Gathering the information pertinent to video recovery and analysis
- ▶ Evidence that is clear and easily deciphered

Project Coordination: The forensic experts at LWG assist you with identifying project goals and designing a cohesive plan to accomplish your video recovery objectives.

Forensic Video Evidence Handling: LWG follows stringent procedures when seizing and maintaining video evidence, while being cognizant of chain of custody and evidence preservation standards.

Video Conversion: LWG technicians are skilled at converting tape media to digital media for data preservation when necessary. Time-lapsed video can also be converted to 'real-time' to enable smooth playback.

Video Analysis: The forensic experts at LWG are skilled at performing a wide variety of forensic video analysis including:

- ▶ Single Camera View Isolation
- ▶ Suspect Spotlighting
- ▶ Color Correction
- ▶ Mathematical Comparison
- ▶ Video Stabilization
- ▶ Production of Still Images From Video
- ▶ Video Noise Removal
